### APPENDIX A

EXPANDITION OF COURSES OF ACTION PROPOSED IN THE BASIC FATER TOGETHER WITH ADDITIONAL ALTERNATIVES FOR CONSIDERATION

1.	Indirect Actions	1
	a. Intensify Efforts to Extend Denial of Landing and	2 .
Ove	erflight Rights to Planes Enroute to Cuba	3
	Advantages	4
٠	- With a minimum of effort this will deny entry of air	
cre	ift into Cuba except from bases within aircraft range and	617
	countries friendly to Cuba.	
	- Avoids necessity of halting aircraft by force with the	
ati	tendant risks.	
	Disadvantages	10
	- Fails to provide for removal of existing threat or	11
hos	stile castro government.	12
	- Dependent upon cooperation of many Allies.	13
	b. OAS or US Demand Castro Destroy or Remove From the	14
Hen	nisphere all Offensiva Weapons and Submit to Inspection	15
and	1 Verification by OAS	16
1,2	Monteges	17
12. 14.	Savide further heightening of tensions and dangers of	18
esc	calation.	19
	- If successful, achieves objective of obtaining removal	20
of	offensive weapons.	21
	Disadvantages	22
	- Fails to remove hostile Castro government.	23
	- Enforcement in sufficient degree to prevent clandestine	24
rei	Introduction of offensive weapons would be difficult.	25
Γ	°.E	26

b. Expansion of current Blockade to Include POL	_17
Advantages	18
- Could eventually be effective enough to degrade	19
significantly the offensive military threat in Cuba.	50
Yould revent the increase in POL supply stocks	21 :
nver that currently available.	22
- Would eventually bring on the economic collapse	. 23
of Cuba and the attendant fall of the Castro government	. 24
- would generate unrest in general in Cuba through .	25
effects on economy and the people.	26
- suld cause Castro to consider removal of the	· · 27
offen ive weapons:	
- Demonstrates US restraint in avoiding direct	29
attack on Cuba.	30

TOD DECEME

3

и в в в в в в в в в в в в в в в в в в в	ı
- Fails to remove offensive threat to US expeditiously	2
- Would produce effects sufficiently severe to encourage	3
encourage serious retaliatory measures by USSR and/or	4
Cuba.	5.
- Directly affects Cuban people through impact on	6
economy, making US more volnerable to condemnation	.7
- Pails to insure removal of the hostile community	
controlled government from Cuba.	
- Requires indefinite continuation of blookede	10
time as Castro regime eliminated and Soviet in Dunnes	
removed.	12
C. EXPANDING EXTETING BLOCKADE TO INCLUDE ONLY FUELS	13.
AIRCRAFT AND MISSILES.	14
Advantages	15
- Avoids impact on Cuban accommy and people and the	16
resulting criticism of US.	17
Fre vents increasing stocks of these fuels for Cuba's	18
	19
artanatre meapons.	20
Amonate ates US restraint and effort to avoid outright	21
conflict.	22
Disedventages	
- Fails to eliminate current offensive threat	23
Des not contribute to anti-Castro efforts in Cuba-	24

- ----

d. Complete Sea Blockade of all Imports	:
Advantages	2
- Would lead to economic collapse of Cuba.	3
- Avoids direct attack on Cuba with its attendant	
casualties and damage.	
- Demonstrates US restraint and avoidance of war.	
- Provides environment for further negotistions in	
removal of offensive weapons.	
E1sadvantages	
- Fails to eliminate existing offensive weapon throat	
in time available.	
- Perpatuates tension and promotes incidents which	12
coul provide the basis for expanding into wer.	13
- Complete blockege affects Cuban people directly	
	14
rath than being limited principally to the military,	15
and Un more vulnerable to condemnation.	16 
- Even 12 blockade should result in successful	17
ions it would leave a hostile communist-controlle	
This to continue to threaten Western Hemisphere and	19
would not insure against introduction or offensive	20
weepc into Ouba, he will be the control of the c	. 21
- Ties up US forces for an indefinite period.	22
8 nding Blockade to Frevent Entry into and Departure	. 23
Alrers from Cuba	. 24
Alventages	25
C plements sea blocking by preventing introduction;	26
of important cargo by air.	27
Firm ates commicating through serial flights be-	28
tax 1 c he and the rost of the world.	29
- Provides further heresement which might encourage	<b>3</b> 0
Cas o consider removal of effensive weapons.	31

WOOK Dig	٠.٠	<i>:</i> N:	,,	71

*** *** *** *** *** *** *** *** *** **	1
- Might provoke similar USSR reaction elsewhere, e.g.	., 2
Berlin.	3
- Provides basis for incidents which might escalate	- 4
to war.	5
- Not a decisive step in the climination of the Cuban	. 6
threat or the Costro government.	
- Would be of indefinite duration.	
2. Air Strikes Against All Offensive Weapons Systems	
Missiles and Combat Aircraft, as well as Related Air Sefens	
Systems as necessary	
Alventages	10
- Eliminates immediate threat and so accomplishes	13
stated objective.	14 <sup>-18</sup>
- Minimizes risks of Cuban attacks on the United State	
or Allies since entire offensive system is destroyed.	16 -
Disadventages	
- Leaves Cuba in the hands of a hostile communist regin	17
main a threat to the Western Hemisphere.	melo
。	19 /
a continuing blockade or similar surveil-	20
lance system capable of preventing the reintroduction	21
of offensive weapons into Cuba,	22
- Entails essentially the same risks of escalation	23
as an all-out invasion with less promise of achievement	24
of lasting results.	25
	,

g. All-Out Invasion of Cuba	1
Advantages	2
- Achieves US stated objective (eliminates missiles and	3
sites, combat aircraft and the Castro regime from the	.4
Western Hemisphere).	5
- Confidence in US determination to take all necessary	1
actions to remove threats to the Free World will be	
materially enhanced with beneficial effects on our	
Allies and nonaligned nations.	
- The communist threat in Latin America would be	12
considerably weakened.	11
- Re-establishment of Cuba as a free and independent	12
nation with a viable economy will erase in the long	13
rum early, criticism of US military actions.	14
Dissevantages	15
- Belated recourse to this course of action would	16
reduce its effectiveness.	17
Tartied States might be denounced as an aggressor	18
in the partie Nations.	19
- Soviets could cause violent reactions in Berlin	<b>50</b>
against US interests throughout the world.	21
- Could lead to general war if the Soviets mis-	23
calculated US intentions and determinations.	23
- W ld opinion could go against the US instigated by	24
Soviet ropaganda media.	25
- Greater likelihood of Cuban attempts to launch offen-	ءَدَ
	27
	23

#### Och Chonne

3. Additional courses of action are covered below. Any or	1
all of these can be taken concurrently with any action direct	l <b>y</b> 2
concerned with Cuba. Each is designed to pose the Soviets wit	th 3
a problem of how to proceed, always indicating to the Soviets	4
the choice of removing the offensive weapons from Cuba is the	5
quickest way to remove the irritation.	6
a. Closing US Ports and Airfields to Soviet Ships and	7
Aircraft:	8
Advantages	
- Restricts Soviet freedom of movement.	
- Restricts Soviet trade.	
- Reduces Soviet intelligence opportunities.	110
- Reduces the danger of Soviet covert attack.	13
Disadvantages	14
- Reduces communications and contact between the US	15
and USSR.	16
- Reduces US/USSR trade and forces USSR to trade	17
elsewhere.	18
<u> </u>	19
	20
	21
	22
$\cdot$	23
Advantages	. 24
- Would weaken Cuban and Soviet ability to maintain	25
and increase military threat to the United States.	26
- Would tend, to weaken control of Castro government	27
and Soviet confidence in it.	-88
Disadvantages	29
- Would require considerable time to produce desired	30
effect	31

d. Economic Action. Implement a master offensive	14
economic plan with the primary objective of sharply	15
reducing the flow of industrial, agricultural and military	16
material reaching the USER and its satellites. Concurrentl	
take action to reduce sclasted imports from the USSE.	18
	19
The sec the sconcaic stability of the USSR.	 20
could divert critical USSR resources to undesirable	
channels.	22
- Would restrict flow of material required to sustain	23 .
BSSR defense effort.	24
Di :dvantages	25
- Adverse reaction from Allied nations.	26
- Heavier load on US resources to fill vacuum.	27
- Success depends on allied cooperation.	28

## APPENDIX B

# SCENARIO OF LIMITED ATTACK ON MREM SITES AND JET FIELDS

A. Factual Backgro	und	•		1
The IRBM sites	and <b>associated</b> nucl	ear storage fac	ilities are	2
still under constr	uction and do not c	onstitute a pre	sent threat.	3
The present offens	ive threat appears	to be concentra	ted in the	# £
six MRBM areas and	the five jet field	s available to	the IL28's	5
and MIG*				2.6
An air attack c	oncentrated on thes	e il targets, p	lue defense	7
suppression include	ing the 8 SAM sites	immediately pr	orecting	8
these eleven targe	ts should therefore	deal with the	neart of	9
the present offens	ive threat.		•	10
Because of the	impossibility, of as	suring night ti	ne surveil-	11
lance, acequate for	rce to assure disab	ling of all off	ensive	. 12
systems in the elec	ven target areas du	ring the initial	l attack	13
should be provided				14
What is under di	iscussion in this pa	iper is, therefor	ore, a one	15
des atto k on eleve	en terget areas, acc	companied by nec	essary	16
defense rupresator	n. Such an attack t	might involve a	proximately	17
250 sorties.			•	18
B. The Problem			•	19
To analyze the's	ections which should	i have preceded	such an	20
attacic.			•	21
C. Assumptions				28
It is assumed th	nat:			23
a. The Boviet Un	nion has votoed the	U.S. resolution	in the	24
Security Council.				45.
b. We have no ev	idence that removel	or dismantling	; of existing	z 2C.
offensive systems h	as begun.			27
